Date: Monday, March 11, 2013 3:06:51 PM

Emy,

We are available on Tuesday, March 12, at 11 am to discuss the air sampling outline. I will send out a meeting notice with a call-in number shortly.

The last land application of molasses occurred on October 22, 2007.

Please contact me with any questions or comments.

Thanks,

Brian

Subject: EXTERNAL: Followup Phone call on Outline

Brian,

Are you and/or Mike available for a 1 hour phone call on March 12 between 8am and 12pm? EPA would like to have a follow-up conversation about the Work Plan outline, similar to the one we had today. Christy Brown, Linda Meyer and I would participate on the call.

I also left you a voicemail asking if you can confirm the date when surface application of nutrients were stopped at the CERCLA landfill. Some documents say this occurred from 2002-2005, but I have also heard that surface applications continued after 2005. Can you tell me when exactly these stopped and how ensure the dosing/batch treatment dates are not being used.

Please let me know.

Thanks,
Emy
